Art Unit: 1755

Newly submitted claims 19-21 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

The newly submitted claims define a process wherein the polishing composition is changed during the polishing process. The original claims, however, did not require this. The original claims only required interrupting the polishing process. In view of this, the newly added claims above are of a different scope when compared to the originally claimed invention and could have been restricted out if originally filed because the new process is entirely different from the process as originally claimed

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 19-21 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Applicants are required to cancel these claims.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 15-18 are rejected under 35 U.S.C. 103(a) as obvious over Sahota et al.

Sahota et al. teach in column 15, lines 50-60 and claim, a CMP process for semiconducting layers which involves decreasing the flow of a polishing slurry prior to removing the wafer from against the platen.

Art Unit: 1755

It is the examiners position that the reference implies and therefore makes obvious the claimed invention because the disclosure of “decreasing the flow” broadly implies that the flow is not stopped but decreased only and the limitation “removing the wafer from against the platen” implies that the mechanical abrasion is stopped due to the removal of relative motion between the platen and the wafer. In view of the, the entire limitation “decreasing the flow prior to removing the wafer from against the platen” implies that the flow is not stopped at the time in which the mechanical abrasion is stopped due to the removal of relative motion between the platen and the wafer. The teachings of the reference thereby broadly encompasses and therefore make obvious the claimed features.

Applicant's arguments with respect to the originally pending claims have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1755

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

In view of the teachings as set forth above, it is the examiners position that the references reasonably teach or suggest the limitations of the rejected claims.

A reference is good not only for what it teaches but also for what one of ordinary skill might reasonably infer from the teachings. *In re Opprecht* 12 USPQ 2d 1235, 1236 (CAFC 1989); *In re Bode* USPQ 12; *In re Lamberti* 192 USPQ 278; *In re Bozek* 163 USPQ 545, 549 (CCPA 1969); *In re Van Mater* 144 USPQ 421; *In re Jacoby* 135 USPQ 317; *In re LeGrice* 133 USPQ 365; *In re Preda* 159 USPQ 342 (CCPA 1968). In addition, "A reference can be used for all it realistically teaches and is not limited to the disclosure in its preferred embodiments" See *In re Van Marter*, 144 USPQ 421.

Evidence of unexpected results must be clear and convincing. *In re Lohr* 137 USPQ 548. Evidence of unexpected results must be commensurate in scope with the subject matter claimed. *In re Linder* 173 USPQ 356.
